DETAILED ACTION

Drawings

1. The drawings are objected to because fig. 7, box 114 "T" should read --TO--. Fig. 8, box 136 "vioce" should read --voice--. Fig. 9, box 160 "renered" should read --rendered--.

Correction is required.

Claim Objections

2. Claims 1-6 are objected to because of the following informalities: Claim 1, line 10 "the" should be deleted. Claims 2-6 are objected to for depending on claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites that the transmission job originating station comprises an information receiving subsystem which is remotely located from the transmission job originating station. How can the transmission job originating station comprise the information receiving subsystem and the information receiving subsystem be remotely located from the transmission job originating station? Claims 3-6 are rejected for depending on claim 2.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bloomfield(US 5404231).

Bloomfield teaches a facility which enhances facsimile communications. Fig. 1 reads on the printing system. The fax equipped computer(20b) and the fax terminal(16b) reads on the printing machine. A waybill form(102; fig. 4) reads on the job ticket. Each of the items on the form(102) reads on the set of job execution attributes. A confidential retrieval code mark(124) reads on the one programmable set of information. A facsimile store and forward facility(F-SAFF 10) reads on the transmission job originating station. A confirmation facsimile number mark area(122) represents the confirmation destination. A data interface(52) reads on the document generating subsystem. A fax terminal(16b) reads on the user interface. An optical character recognition subsystem(72) reads on the control subsystem.

Allowable Subject Matter

6. Claims 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
